

Call for Support for the Acquisition of a New Anesthesia Ventilator

Hôtel-Dieu de France (HDF) is a prestigious, non-profit academic medical center, operated by the Saint Joseph University of Beirut (USJ). Established in 1923, HDF was founded 35 years after the creation of the Faculty of Medicine at Saint Joseph University, marking a significant milestone in the healthcare landscape of Lebanon.

Quality is a fundamental principle in the management of Hôtel-Dieu de France, guiding the efforts of all medical, care, and administrative professionals in their dedication to patient service.

As part of our commitment to providing cutting-edge medical care, HDF needs to modernize its medical equipment. One of the priorities of this initiative is the acquisition of an anesthesia ventilator for the vascular catheterization room.

■ PROJECT TITLE:

Acquisition of a New Anesthesia Ventilator.

■ APPLICANT:

The radiology Department at Hôtel-Dieu de France, an academic medical of Saint Joseph University of Beirut, under the direction of Professor Kamal Hachem. Each year, 3,647 interventional radiology procedures are performed on patients under intervention in the vascular catheterization room.

■ PROJECT DESCRIPTION:

The interventional radiology department at HDF is a key service that performs 3647 interventional radiology procedures annually for patients requiring anesthesia, particularly in the context of vascular catheterization procedures. Currently, the available equipment no longer meets the modern technological standards required to ensure optimal care.

The acquisition of a modern anesthesia ventilator will improve patient care by providing precise and tailored ventilation while enhancing the safety of the procedures.

■ OBJECTIVES:

- Ensure optimal patient care in the interventional radiology room with a modern and high-performance ventilator.
- Reduce risks for patients under anesthesia during delicate procedures.
- Improve working conditions for medical teams with state-of-the-art equipment.
- Support the modernization and excellence efforts of the interventional radiology service.

■ IMPACT:

The acquisition of a modern ventilator for interventional radiology will have a major impact on the quality and safety of care at Hôtel-Dieu de France. This investment will benefit several key stakeholders:

- **Patients:**

- Secure procedures with optimal respiratory support.
- Improved anesthetic management, ensuring enhanced comfort and safety.

- **Medical Teams:**

- Optimized working conditions with advanced equipment facilitating the execution of complex procedures.
- Improved efficiency and precision in interventional radiology procedures.

- **HDF and its hospital network:**

- Effective response to the growing demand with an annual volume of 3647 interventional radiology procedures.
- Redistribution of the still-functional old ventilator to another hospital in the network, thereby contributing to the improvement of care at the regional level.

■ COST AND BUDGET:

The estimated cost for acquiring the anesthesia ventilator is **USD 66,000 USD**.

Equipment	Anesthesia ventilator
Quantity	1
Unit Estimate	66,000 USD
Total Estimate	66,000 USD

To express our deep gratitude to the donor, a plaque bearing their name will be installed in recognition of their valuable support. Additionally, their name will also be displayed on the donor wall.

■ TRANSPARENCY AND REPORTING:

We are committed to ensuring complete transparency regarding the use of the funds received. A detailed financial report will be provided, along with a narrative report on the impact of the donation. These documents will be shared with all donors and partners.

Let us unite so that we keep standing by the patients' side and may your valuable contribution allow us to take care of more patients.
